

2008 Airside Construction Noise Advisory

Date of Release: October 3, 2008

The Taxiway Delta between Taxiway Mike and the Runway 06L threshold renovation project has proceeded much faster than originally scheduled. As a result, the remaining phases of the project will not result in long period noise impact on normal aircraft traffic patterns.

Notification of any future short period airfield closures affecting normal aircraft traffic patterns will be by Noise Office Advisories and voice mail messages on the noise complaint line.
