

Runway 33L ILS Flight Inspection – May 21, 2009

Date of Release: May 19, 2009

Nav Canada will be completing an Instrument Landing System inspection on Runway 33L from 9:30 a.m. to 11:30 a.m. on May 21, 2009. A white and blue regional jet will make repeated approaches to the runway at low altitude without the landing gear down approximately every 5 to 10 minutes.

These unusual aircraft manoeuvres are normal operations required for Instrument Landing System inspections. Daily weather and air traffic conditions may require adjustments to the actual times of the flight inspection.
