

Runway 15L-33R Construction Restrictions: May 12 to July 6, 2008

Date of Release: May 16, 2008

From May 12 to July 6, 2008 for 24 hours each day, Runway 15L-33R will be reduced in length to 9291 feet for airfield construction. Runway 33R arrivals from the south will only occur in good weather conditions and Runway 15L or 33R departures by long haul aircraft will be limited due to the reduced runway length.

These runway restrictions will result in increased operations on other flight paths during these hours including possible non-preferential flight paths between midnight and 6:30 AM.
