

Tenant "Train the Trainer" Training

Course Level: Intermediate

Description: This program consists of three modules. The first module will provide an overview of the roles and responsibilities for the trainer. The second module will provide an overview of the GTAA Tenant Security Program and the links to the airport Emergency Management Program. The third module will provide an overview of the of the Canadian Security Regulations (CARS), the GTAA tenant Security Plan and provide training information assigned to deliver access control training to its tenant employees. Upon completion of the course the trainer will require to pass a written test.

Requirements: It is important to submit the training to all tenant employees for the intent safety and security of the airport. This training is a part of the Tenant Security Plan.
