

Pre-Service Firefighting Refresher Program (5 Day)

Pre-Service Firefighting Refresher Program (5 Day)

Prerequisites: The course is available to all graduates of the Pre-Service Program, NFPA Programs and Volunteer Firefighters.

Description:

Day One:

Class will divide into small groups; each group will complete the following training stations;

- Breathing Apparatus
- Building Search & Rescue Techniques
- Basic Rope & Knots
- Ladder Operations
- Advancing Hose Lines

Day Two:

Class will divide into groups; each group will use the skills from day one and participate in evolutions in the smoke tower, each team will:

- Advance charged hose lines into a smoke filled environment
- Use proper radio communications
- Conduct proper search techniques and remove trapped victims
- Utilize proper ladder techniques

Days Three to Five:

Class will divide into groups; each group will use the skills from day one and two and participate in evolutions in the live burn tower. Each team member will have multiple runs as a team member of the following areas:

- The initial attack sector
- The rapid intervention sector
- The ventilation sector
- The accountability sector
- The re-habilitation sector

Goal:

This program is designed to refresh the skills of a Pre-Service graduate who has graduated and is seeking employment in the fire trade. This intensive, skill oriented program will assist the graduate in maintaining skill sets required within the fire fighting trade. The program will take the student back to the basics of breathing apparatus, rescue techniques, rope skills, ladder operations, advancing hose lines and advancing to full team live fire operations. All required equipment supplied by FESTI.
